

(b) (6)

While out on the playground I noticed (b) (6) ear was swollen. I asked (b) (6) if something had happened. (b) (6) told me that (b) (6) had seen it earlier and said something to dad. He said it was from a bug bite. I noticed that it was hot to the touch. (b) (6) said it was more swollen than the morning time. We decided to give dad a call and let him know. (b) (6) held the door for me while I went in to call dad. I went to the cabinet where the emerg. forms were. I got dad's number and brought the paper w/ me to call. I talked to dad for a few minutes. After I talked to dad, I returned the form to the cabinet. At that time (b) (6) was coming back from break and asked ~~me~~ what I was doing. I told (b) (6) I called (b) (6) dad because of (b) (6) ear. (b) (6) said let me get some ice. (b) (6) asked what (b) (6) was doing. I told (b) (6) as I walked out and (b) (6) closed the door. Later (b) (6) came out to do an observation. I asked (b) (6) if (b) (6) could grab me the bleach bottle from the room because a child had gotten snot all over a ball. (b) (6) went in and got me the bleach. I cleared off the ball. Interacted w/ children. After getting kids water a few times I notice the cooler was emptied. I let the other staff know that I was going to get more Ice & water. I signed out and left w/ the cooler from the playground. I went to the kitchen to fill the cooler. When I was done I came back onto the playground from the side gate & took the cooler back to its place. ~~If I signed back~~ Shortly after returning (b) (6) was getting ready to leave. I heard (b) (6) saying that (b) (6) found a ~~stray~~ child in the room by (b) (6). Shortly after we cleaned up and did name to face, ~~we~~ and swept the ~~area~~ playground and went in. (b) (6)
